Dear Jude –

I am so happy you go to Special Reading School. You are learning so much!

You are a smart boy who works hard. You are learning to read. You are learning to write. You are learning math. Way to go!

Every kid has things they are good at. You are good at learning when you can see and touch. You are good at learning when you can move! You are good at learning by watching other kids. You are so good at learning these ways.

Every kid has things that are hard for them. Some kids have a hard time learning to read. You are one of these kids. You need a special way to learn to read. That's OK!

Your school is just right for kids who learn like you. Your teachers can teach you the way you learn. You will learn fast at your school!

Every kid has different feelings. You are happy a lot. Some of the time, you worry. You may feel sad. All feelings are OK.

You can talk to mom or dad when you worry. You can talk to your teachers. You can also talk to a feelings coach. They have ways to help you feel better.

You have a great brain. Keep working hard! You will do great things.

From,

Dr. Nelson
